To Whom it May Concern:

Edmanson Constructions had previously successfully completed two other projects for Crest Education Ltd. at our Rivercrest Christian College campus, and we were pleased when Edmanson Constructions were selected through a tender process to undertake the construction of our new Primary Multi-Purpose Hall at Hillcrest Christian College.

This project involved the creation of a new multi-purpose hall / full sized basketball court which included the striking use of various detailed internal acoustic wall and ceiling linings and a Pulastic sports floor. The building included a kitchen, amenities facilities, indoor and outdoor learning areas, large decking areas and an external basketball court.

On site, the project has been very well managed by Rob Jenkins, who has provided a safe and secure worksite with a professional team that has completed the works with minimal disruption to the school's operations.

In all these projects with Edmanson Constructions, we have found Andrew and his team to be highly professional, transparent and fair in how they dealt with project changes, variations and timelines. Edmanson were able to be flexible to support our day to day school operations and their proactive communication improved safety and minimised disruptions.

Crest Education is very pleased with this outstanding facility and the high quality of the works and would recommend Edmanson Constructions for any future building projects. I am happy to be contacted if you require further information.
