## To whom it may concern: Edmanson Constructions

Edmanson Constructions were selected by the School through a tender process to undertake the refurbishment of our Senior School Science precinct. The project included a major refurbishment and extension of our existing Science precinct which constitutes a combination of wet and dry area science labs, staff workrooms, prep rooms and a large courtyard.

The project was particularly complex as the School needed to maintain use of the precinct throughout the entire refurbishment. The project had to be phased over a fifteen month period and needed to be held over during the third term due to VCE requirements.

Andrew Edmanson and his entire team were extremely understanding of the School's needs and constantly worked around the School's timetable and teaching needs. The quality of work was of the highest standard. Andrew and his team worked closely with the School's architect and project manager and the School to identify value management opportunities which delivered savings to the School without any deterioration in quality, something that the School was extremely grateful for.

The School would highly recommend Edmanson Construction for building project considerations. Personally, I found Andrew to be an extremely professional operator with high integrity and a genuine desire to deliver the best result for the School at the best price. The quality of the work was second to none and the project was a very engaging and enjoyable process, something that is quite rare in these environments.

I am happy to provide any further details that would assist and can be contacted on my mobile 0434 421 590 or by email on [mzammit@stcatherines.net.au](mailto:mzammit@stcatherines.net.au).

Yours sincerely
